Art Unit: 2821

## **DETAILED ACTION**

- 1. Claims 9-16 are allowed.
- 2. The following is an examiner's statement of reasons for allowance: none of the cited art discloses the excitation device comprises a first and a second distinct and mutually independent excitation element, each suitable for emitting and/or receiving electromagnetic waves, the first excitation element being suitable for working at the first working frequency and the second excitation element being suitable for working at the second working frequency; the or each defect of periodicity of the PBG material forms a leaky resonant cavity exhibiting a constant height in a direction orthogonal to the exterior radiating surface, and determined lateral dimensions parallel to the exterior radiating surface; the first and the second working frequencies are suitable for exciting the same resonant mode of a leaky resonant cavity, this resonant mode being established in an identical manner regardless of the lateral dimensions of the cavity, in such a way as to create on the exterior surface respectively a first and a second radiating spot, each of these radiating spots representing the origin of a beam of electromagnetic waves radiated in emission and/or in reception by the antenna, each of the radiating spots exhibits a geometrical center whose position is dependent on the position of the excitation element which gives rise thereto and whose surface area is greater than that of the radiating element giving rise thereto, and the first and the second excitation elements are placed one with respect to the other in such a way that the first and the second radiating spots are disposed on the exterior surface of the PBG material side by side and overlap partially.

Art Unit: 2821

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HoangAnh T. Le whose telephone number is (571) 272-1823. The examiner can normally be reached on 8:00am-4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Douglas Owens can be reached on (571) 272-1662. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

4. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
